## Best Sire for High JPI, Milk Production, Fat, Fertility, Type & Udder

### Cheese Merit \$

It is designed for dairy farmers who sell their milk in cheese market.  
Fat % Protein has more emphasis in this index.

+557

### Jersey Performance Index

Higher JPI of 132 helps in having higher lifetime efficiency  
resulting in healthy cows, with high components, and also  
helps achieve optimum body size and greater feed efficiency

+132

### PTA Milk

Additional 648 pounds (i.e., 295 kg) of milk production  
as compared to the daughters of the average sire.

+648

### PTA Fat

Additional 47 pounds (i.e., 21 kg) of accumulated fat  
as compared to the daughters of average sire

+47 lbs

### PTA Productive Life

Its daughters will stay more than 3.2 months productive in herd.

+3.2 Months

### Daughter Pregnancy Rate

DPR of 1.1% indicates that its daughters will get 1.1%  
easily pregnant and stay 5 days less open in herd.

+1.1%

### PTA Heifer Conception Rate

Its future breeding heifers will get 1.0% easily conceived  
than heifers of average sire.

+1.0%

### PTA Cow Conception Rate

Its future mature daughters will get 1.7% easily  
conceived than heifers of average sire

+1.7%

### PTA Type

Higher PTA Type indicates better body conformation in its daughters.  
It may help farmers who focus on selling or replacement.

0.40

### Jersey Udder Index

High JUL will help in achieving well-formed and attached  
voluminous udders in its future daughters.

4.40
