Sire is best known for Fertility, Type & Udder Improvement

Cheese Merit \$

It is designed for dairy farmers who sell their milk in cheese market. Fat & Protein has more emphasis in this index.

PTA Milk

Additional 384 pounds (i.e., 175 kg) of milk production as compared to the daughters of the average sire.

PTA Productive Life

Its daughters will stay more than 3.2 months productive in herd.

PTA Heifer Conception Rate

Its future breeding heifers will get 4.1% easily conceived than heifers of average sire.

PTA Type

Higher PTA Type indicates better body conformation in its daughters. It may help farmers who focus on selling or replacement.

Jersey Performance Index

Higher JPI of 118 helps in having higher lifetime efficiency resulting in healthy cows, with high components, and also helps achieve optimum body size and greater feed efficiency

PTA Fat

Additional 44 pounds (i.e., 20 kg) of accumulated fat as compared to the daughters of average sire

Daughter Pregnancy Rate

DPR of 0.6% indicates that its daughters will get 0.6% easily pregnant and stay 3 days less open in herd.

PTA Cow Conception Rate

Its future mature daughters will get 2.0% easily conceived than heifers of average sire

Jersey Udder Index

High JUI will help in achieving well-formed and attached voluminous udders in its future daughters.

BOON

Pedigree: TROOPER {4} x STONEY x MARK
